🛠️ Improvements

- **ICD-10 Code Search Now Available in Transparency-in-Coverage Tool**

  We have added a powerful new search capability for clients and members with access to our Transparency-in-Coverage (TiC) tool. Members can now search using ICD-10 codes to look up descriptions and find in-network providers associated with specific services. This update provides greater accuracy and is part of our commitment to federal Transparency-in-Coverage regulations from Centers for Medicare & Medicaid Services (CMS).
